A Certain Philosophy

2017 Global Trends in Retina Survey

Deadline April 14, 2017

Dear Fellow Members,

Just a brief note to inform you that EVRS has agreed to participate in the 2017 Global Trends in Retina Survey organised by ASRS.

This 15-question online survey—which takes only a few minutes to complete—will measure your preferences on an array of medical and surgical retina issues.

The survey is now live on the ASRS website, and is also available at www.asrs.org/asrs-community/2017-global-trends.

When you access the link, you will be asked for:

- Your email address
- A password (which you will create)

Please note: If you participated in the Global Trends Survey in previous years, please use the username and password you created in the past to access the 2016 survey.

If you are an ASRS member, please [click here](#) to access your survey.

Your username and password will allow you to save your answers and return to the Global Trends Survey if you do not complete it all at one time. If you have any questions or need assistance, please contact caroline.bozell@asrs.org.

Results of the Global Trends in Retina Survey will be presented at the ASRS 35th Annual Meeting, August 11-15, in Boston, Massachusetts. You will have access to the full survey results.

Please take advantage of this opportunity to participate in the 2017 Global Trends in Retina Survey.

The 2016 was very successful and saw an important participation by our Members.

I hope we will do even better this year.

Needless to say, these Surveys help us understand our daily practice better and to improve our “problem solving” capabilities.

Enclosed you will find the results from last year’s Survey.

All the best,

Giampaolo Gini
